<b>Check your set up cost saving telecom</b>	<b># * 37 #</b>
<b>Change language</b>	To set English: <b># 30 * 01 #</b> To set Chinese: <b># 30 * 02 #</b>

I. To make toll free calls with FreePP: if both sides are using the FreePP APP or talkfree box

- **Same country code:** directly dial the set up landline/mobile phone number or the talkfree box ID
- **Different country code:** dial 00 + country code + area code + landline/mobile phone number; or dial directly the talkfree box ID

II. To call a non-FreePP user:

- Using a talkfree box to make calls: set up your cost saving calls provider by dialling **# 37 \* cost saving telecom's code #** (please visit [www.FreePP.com](http://www.FreePP.com) to discover the codes of different service providers)
  - You can directly dial your target's landline/mobile number and if he/she is not using FreePP, the FreePP system will first inform you before automatically switching to a cost saving call.
  - To use a cost saving call, dial: \* + landline/mobile number.
- Using FreePP APP to make calls
  - After opening FreePP APP on your mobile device, select your cost saving calls provider by inputting its code. Then simply press the provider's call button on your dial screen.
